

JOINT FILTRATION FIELD TRIALS

DIRT DEFENCE + SENSOR WEBINAR: A SUMMARY OF RESULTS

Dear Industry Colleagues,

A4A, IATA, and JIG invite you to attend a free webinar on the Joint Filtration Field Trials. This webinar will focus on the Dirt Defence Filter with Electronic Water Sensor System. Learn about the aviation industry's efforts to find alternative into-plane filtration technologies as well as the results of the JIG, IATA, A4A field trial of this new System.

The webinar will be offered at three times for your convenience; all sessions will offer the same content. Please use the buttons below to register for one of the three sessions. This webinar is open to all interested parties; no invitation is required to register. Space is limited and is available on a first-come, first-served basis. All attendees must be registered by 1 September 2020.

Register Session 1

Wednesday
2 September 2020
06:00 UTC
Duration: 1 hour
[Find my local time](#)

Register Session 2

Wednesday
2 September 2020
14:00 UTC
Duration: 1 hour
[Find my local time](#)

Register Session 3

Wednesday
2 September 2020
18:00 UTC
Duration: 1 hour
[Find my local time](#)

All sessions will offer the same content

Who Should Attend:

Personnel with aircraft fueling responsibilities
Airline personnel with responsibility for fueling/fuel engineering
Anyone interested in the industry efforts away from filter monitors

Webinar Agenda:

- Why conduct a field trial
- What equipment has been trialed
- Which operating conditions has the equipment been trialed in
- The results of the field trial
- The conclusions of the field trial
- What's next for filtration field trials
